

DIRT AND DECOR DESIGNS

SPRING 2021 NEWSLETTER

What we've been up to:

Winter is a great time for us to work on behind the scenes business development projects!

Stay tuned- in the next couple of weeks our website will be up and running! A great place for you to see all about us, what we are up to, how we got established, and show case all of the great projects we have accomplished!

While spending time with the family and relaxing, we have also been painting interiors and are currently working on a total home redesign- from siding and windows, down to flooring and paint colors!

Looking Forward

This year we will have a variety of fresh cut bulbs ready to go for beautiful bouquets for your home! With over 200 bulbs planted we are excited to brighten up your space with some Spring color!

Call for a free estimate whether it is for spring mulching, perennial garden installations, vegetable gardens, floral planters, or outdoor design ideas- we are here to create a space you can love and enjoy all season long!

We are also extremely excited that this summer we will be offering soil testing so you can know what to grow best in your gardens!

As spring arrives here are some fun tips to get you started!

- Did you know now is the time to prune a lot of your trees, shrubs, and roses? Prune and place cuts to shape your perennials while the plants are still dormant! Hydrangeas, Rose of Sharon and other late bloomers.
- Wait to prune early bloomers such as lilac, weigela, and forsythia.
- Mulching yearly can help drastically keep weeds down and helps to keep your plants roots cool and moist! - Call us for a quote.
- Sharpen and oil your garden tools to get you ready for the upcoming season.
- Divide perennials
- Remove dead and matted leaves from garden beds
